

# SWINE BLUELITE® 2B

A water soluble acidified electrolyte product with probiotics for pigs.

During times of weaning stress it is important to ensure that pigs receive critical nutrients and maintain proper hydration. Swine BlueLite 2B is a non-antibiotic, natural solution that has been shown to provide consistent and reliable benefits at weaning and for long-term intestinal health. This water soluble electrolyte provides three critical things: acidification, energy, and probiotics to give long term performance action, help to increase the average daily gain, and encourage feed intake.

**KEY FUNCTIONAL COMPONENTS:** Electrolytes, Acidification, Energy, Probiotics

## FEATURES & BENEFITS

- Includes live naturally-occurring microorganisms
- Contains probiotics that can stay viable in water for up to 48 hours
- Provides consistent, reliable rehydration benefits
- Palatable and acidified
- Easy-to-use, water soluble formula
- Can be administered by water medicator
- Use with or without antibiotics
- Reduces potential for pathogenic overgrowth
- Helps to increase villus height

## QUICK REFERENCE

- Specifically developed for swine to help minimize the challenges of weaning and intestinal disturbances
- An excellent product for any feeder pig or farrow-to-finish operation that is concerned about the health and quality of their piglets
- An innovative combination of hydration support and specialized gut microbials that helps to reduce mortality, reduce treatments, increase average daily gain and wean weights

## WHEN TO USE

- To stabilize and improve intestinal health
- To increase feed intake
- To support the immune system
- To reduce the use of antibiotics
- For performance advantage for piglets
- To help weanlings get off to a fast and healthy start
- To help decrease mortality

## DIRECTIONS FOR USE

### Water Administration:

Administer Swine BlueLite®2B in the drinking water for 5 -7 days helping to maintain normal hydration status in piglets.

Administer Swine BlueLite®2B in the drinking water in one of the following ways:

- Mix 30 g of Swine BlueLite®2B for each 15 liters of drinking water
- Mix 500 g of Swine BlueLite®2B for 250 liters of drinking water (corresponding to 1 kg per 500 liters of drinking water)
- Stock solution: Mix 1 kg of Swine BlueLite®2B in enough water to make 4 liters of stock solution. Administer 30 ml of stock solution with each 4 liters of drinking water.

## AVAILABLE PACKAGE SIZES

1 kg bag
