

BOVINE BLUELITE®

Rehydrate. Recover. Perform.

Hydration is the key component to herd health and performance. An easy-to-administer electrolyte, Bovine BlueLite is very palatable, buffered, and provides added energy sources and vitamins necessary to help recover from dehydration. Use Bovine BlueLite to help cows rehydrate after freshening and in times of heat stress.

KEY FUNCTIONAL COMPONENTS: Electrolytes, Acidification, Multiple Energy Sources, Vitamins

FEATURES & BENEFITS

- A high potassium electrolyte for quick replacement
- Highly palatable and buffered electrolyte formulated for dehydration
- Contains multiple energy sources
- Convenient packaging for ease of administration for individual or whole herd treatments
- Highly soluble powder to add to water, mix in TMR or top dress on feed.

WHEN TO USE

- For fresh cows daily, during 2 weeks post-calving
- For all cows during hot weather and heat stress events

DIRECTIONS FOR USE

When to use:

Use for 5 to 7 days during stressful events. Use during the first 2 weeks post calving. Use 2 days prior, through transportation and 2 days after.

How much to use:

Times of Stress
In water: Individual animal, 15 g to approximately 4 litres of drinking water.
Water Tank: 500 g in approximately 250 litres of water.

Cattle in transport:

Adult Cattle: 60 g per day
Use 2 days prior, through transportation and 2 days after.
Young Stock: 30 g per day
Use 2 days prior, through transportation and 2 days after.

Feed Mixing/Top Dressing:

Young Stock: 30 g daily
Adult Stock: 60 g daily

AVAILABLE PACKAGE SIZES

3 kg bag
