

An easy-to-use capsule containing a source of live (viable) naturally occurring antimicrobials and probiotics for digestive health support.

Protect the future of your herd with Calf Renova. When calves are susceptible to scouring or at first signs of diarrhea, helping them recover their hydration status and appetite for continued growth is the top priority. Calf Renova helps to reduce harmful bacteria and restore the gut microbiome. Quickly address enteric health issues with Calf Renova, and help support recovery by enhancing intestinal microflora and encouraging dry matter intake any time that normal digestive health has been interrupted.

**DIRECTIONS FOR USE**

During periods of or after digestive problems give 1 capsule per calf at 3 days of age or later, repeat daily if required. Do not exceed 3 consecutive days of providing capsules.

**KEY FUNCTIONAL COMPONENTS:** Essential oils and probiotics

**FEATURES & BENEFITS**
